Office Table

1994

This table is suitable as a drawing area computer workstation for 2 to 6 people. Holes of different size follo9w the longitudinal axis of the $2.80\ m\ /\ 1.60\ m$ wide surface. The three large circular cut-outs are used to feed throughComputer / telephone / desk lamps cables .

To stiffen the structure and as a lower bracket (shelf space for cables, computers, etc.) anothers brace creates structural stability in combination with the existin frame..

The legs are height adjustable to compensate for any ground level differences.
